

# Questions related to Community Faculty

## Can I do the placement in my current workplace?

If you work in the community services industry and your role fits with the course you are studying, then you may be able to complete your placement in your current workplace. It is important that you discuss your role with a trainer prior to completing placement documentation to ensure that it is an appropriate role/workplace to be completing your assessment work. You will need to provide the training team with a copy of your position description and a letter from HR stating how long you have worked in that role so we can ensure that your current role will be able to support you to completing the assessments. Please note, your work should involve working directly with clients in the industry rather than an administration or another non-industry related role. Please contact the training team on 1300 887 991 alternatively join a virtual class to discuss completing the placement in the workplace.
